The Atlantic coast breadth has suffered

more from adverse conditions than the gulf coast area. Excessive moisture in August and early in September with drouth and high temperature later tested the vitality of the plants of the coast region severely, the deding of leaves and bolls, premature opening and light yield. West of the Mississippi there was variable moisture. One county in Texas, for instance, reports continued drout for ninety days while as continued drouth for ninety days while another notes the prevalence of destructive rains. This section reports a smaller loss of fruitage by sudden changes of temperature and rainfall than the more Eastern states. There are insect losses somewhat general, though not unusual, or very heavy throughout most of the cotton belt from the caterpillar, boll and army worms, especially in bottom lands.

New York, Oct. 10.—The stock market to-day was very dull. Fire Department Report for September Serious Runaway Accident-Exhibits for the Fair-Burglary.

Special to the Gazette

Dallas, Tex., Oct. 10.-The testimony taken by the council committee on the con-dition of the waterworks service is creating much comment here to-day. One thing is certain, the machinery at the pumping sta-tion was, through neglect, allowed to run down and be broken, thereby rendering it impossible to furnish the city with water. Again, the testimony plainly shows that the council, water commissioner, water superintendent and chief engineer were all derelict in their duties in allowing the pumping station to get in its present bad condition. It is not likely that the committee will submit their respect to the council. tee will submit their report to the council to-night, but if they should it is likely that they will recommend the discharge of the commissioners, engineer and superintend

CHICAGO, ILL. Oct. 10.-The price of wheat CHICAGO, ILL., Oct. 10.—The price of wheat was chiefly governed by the tone of foreign advices to-day. Prices were higher most of the day as the result of speculative excitement and decidedly higher prices in Liverpoot, but toward the close prices abroad weakened and under heavy realizing sales the weak market here responded and all of the gain over yesteray's last figure was lost, with something besides. Corn was a little more active and generally

stronger, though there was not much animation in trade. October opened 53% or % higher than yesterday's close, but sold off to 53c, at which it closed.

Hog products weak and the course was downward throughout the day. Lard is off 7.42 loc. and ribs 50,15c.
